

What is EMS 14001

The ISO 14001 Environment Management System (EMS) standard was first published in 1996. It is an internationally recognized environmental management standard which uses a systematic framework to manage the immediate and long term environmental impacts of an organization's products, services and processes.

Certification Europe (UK) Ltd is accredited to certify your environmental management system to the ISO 14001 standard. As an organization we also offer an ISO 14001 Small Business Certification scheme to qualifying businesses. ISO 14001 is part of the ISO 14000 Environmental series and forms the cornerstone of the family of standards. It delivers a framework for organizations to follow when implementing an environmental management system.

benefits of the ISO 14001 environmental certification:

- Distinguish cost savings with greater emphasis on resource, waste and energy management.
- Improve the corporate image and credibility.
- Quantify, monitor and control the impact of operations on the environment.
- Safeguard legislative and statutory awareness and compliance.
- Enhance the environmental performance of your businesses supply chain.
- Protect the company, assets, shareholders and directors.
- Potentially reduce public liability insurance costs for your business.
- Expand your access to potential business partners and customers.
